LOGIN

- Is there a redirect parameter used on the login page?
- Try to control it!
- Even if you don't see one try various upper/lower cases:
`returnUrl, goto, return_url, returnUrl, cancelUrl, back, returnTo`

LOGIN

- What happens if login in with `myemail%00@email.com` ?
Does it see it as `myemail@email.com`
- If yes, signup as `my%00email@email.com` for ATO.
- Think the same for claiming username

LOGIN

- Can I login with my social media account?
- If yes, oauth flow, token leaks?
- What social media accounts are allowed?
- Is it the same for all countries?

LOGIN

- Sometimes you can only login via social media and **NOT** register
- How is mobile login flow different from desktop?

Thank You!
